

Planning

2016

Signed Purchase Agreement for 46-Unit Apartment Development (overflow parking south of the Community Center). City Council did not approve project location. The EDA has been working with the Developer on new locations.

2017-18

Comprehensive Plan Update – 11 community meetings have been held to develop chapters of the Plan. Housing was a main component of the planning process.

Spring 2018

Flooding in the Red Leaf Court and 18th Avenue Neighborhood. Street Department has been reviewing previous engineering studies and proposals. Funding is a significant barrier to implement a storm water project.

Summer 2018

The 46-unit apartment developer was originally only interested in property by the lake, river, or golf course. Property by the school was not an option until the water retention/detention pond project was developed as an additional benefit to the neighborhood.

Apartment Amenities: Pond & School
